at Luddington on Tuesday 17th November 2009

BASIS and NRoSO points available for this event

Irrigation in a changing climate

Save water, save money
and get fit for the future

Tuesday 17th November 2009

Host: Sandfields Farms Ltd
Manor Farm
Luddington
Warwickshire CV37 9SJ

Programme

Presentations from leading independent irrigation experts. Learn more about your local water resources and the implications of climate change to your business, trends in irrigation equipment and irrigation reservoirs, water abstractor groups and protecting your water rights, and sources of support funding for irrigation. Followed in the afternoon by practical on farm demonstrations. Several industry suppliers will be on hand to answer any commercial questions you may have.

- 9.30 Registration and coffee
- 10.00 **Welcome and introduction** Chairman and Host farmer
- 10.15 **Local water resources - availability and pressures** Environment Agency
- 10.45 **Adapting to a changing climate** Jerry Knox, Cranfield University
- 11.15 **Changing irrigation technologies** Melvyn Kay, UK Irrigation Association
- 11.45 **Improving infield water management** Simon Turner, Agri tech Ltd
- 12.15 **Funding opportunities for water management** Advantage West Midlands
- 12.30 **Lunch and trade stands**
- 13.15 **Practical demonstrations** Irrigation equipment, pumps, scheduling
- 15.15 **Tea and depart**

Attendance is FREE, lunch provided, but you must register in advance

This one-day event is supported by Farming Futures, the Environment Agency, UK Irrigation Association, Horticultural Development Company, and the Potato Council.

It is sponsored by Farming Futures and the Environment Agency.

The organisers would like to thank Sandfields Farms Ltd for their support in hosting the event.
